THE STUDY PLANNAR

THE STUDY PLANNAR

- The Study Planner is a web application that provides students with a comprehensive platform for planning and managing their study schedule.
- Our goal is to help students become more organized, productive, and successful^s in their academic pursuits.
- The Study Planner offers a range of features, including a user-friendly interface, personalized study plans, progress tracking, and reminders to keep students on track.

KEY POINTS

- Personalized Study Plans
- Progress Tracking and Reviewing
- Event Reminders and Notifications
- Personalized Study Notes
- Access to Google links for stress management

MAJOR USAGES

- The tools majorly used in the project are:
 - Python
 - Tkinter
 - CSV file handling
 - PIL (Python Imaging Library)
 - Threading

EACH PAGE DETAILS

- **Page 1: Home**

Describes the home page with the project title and welcome message with a self-destroying page

- **Page 2: Student Details**

Discusses the functionality of this page, which allows students to log in or sign up

These details are then saved in a CSV database with the name "credentials.csv"

EACH PAGE DETAILS

- **Page 3: Questionnaire**

Explain the purpose of the questionnaire page

Describe the input fields and their significance:

Subject name, Complexity weight, Marks weight

Explain the recommended study hours calculation based on the complexity and marks weights

- **Page 4: Study Plan**

Describe the functionality of this page, which displays the recommended study hours and allows users to track their progress

Explains the progress calculation based on actual study hours entered

EACH PAGE DETAILS

- **Page 5: Add Event**

This page allows the user to save important events using the Tkinter calendar
It also pops a reminder that flashes the event name at the time that is given by the user

- **Page 6: Personalized Study notes**

It enables users to make personalized study notes or reference materials for any subject they wish to and thereby saving it to their respective devices

EACH PAGE DETAILS

- **Page 8: Other**

Provides relaxing techniques to the user for stress management during long study hours
